I am excited to apply for the mechanical engineering position at your company. As you will see in my resume, I have experience in many different engineering job positions such as repair engineer, assembly manager, R&D and 3D design engineer. My background in electrical and mechanical engineering and strength to overcome obstacles have allowed me to employ a creative and comprehensive approach to solving problems, and I believe I can contribute the same and much more to your mission and goals in the future.

The 8 years' experience in soldering hundreds of legs of electronic chips between millimeters have transformed me into a meticulous and extremely skillful engineer. Furthermore, when I worked as an assembly and repair technician, I dealt with hundreds of different mechanical models. From this experience I learned the reasons behind defecting mechanical parts and ideas of designing them for easier assembly and repair.

In addition, I had a big chance that I received the mechanical design patents when I worked as an R&D and modeling engineer. For instance, I used SolidWorks to design and simulate the products which reduced costs and increased efficiency, resulting in saving \$2 to \$4 per unit

Six years ago, I was involved in a serious motor vehicle accident. I damaged my left leg and lost my right leg which has slightly impaired my mobility. It was extremely difficult to return to school from a six-year break, but with persistence, I was able to complete all of the remaining courses and graduate from UCSD with mostly A's. After graduation, I decided to have more leg surgery to restore more function. Thanks to the surgeries and therapy exercises, I am now able to do most things that I have done in the past. In spite of this disability, I developed patience, learned perseverance, and a positive life approach. I was recognized for this character while working in Tap electronics.

I sincerely look forward to becoming a member of your team and to learning from your values, culture, and expertise. My wife and I will move to Seattle in December. I have a strong willingness and the keenness to learn anything. Please do not hesitate to reach out me at your convenience. Thank you for your time and consideration.

Best regards,

Ji Yong Kim
